

Identifying patterns of behavior

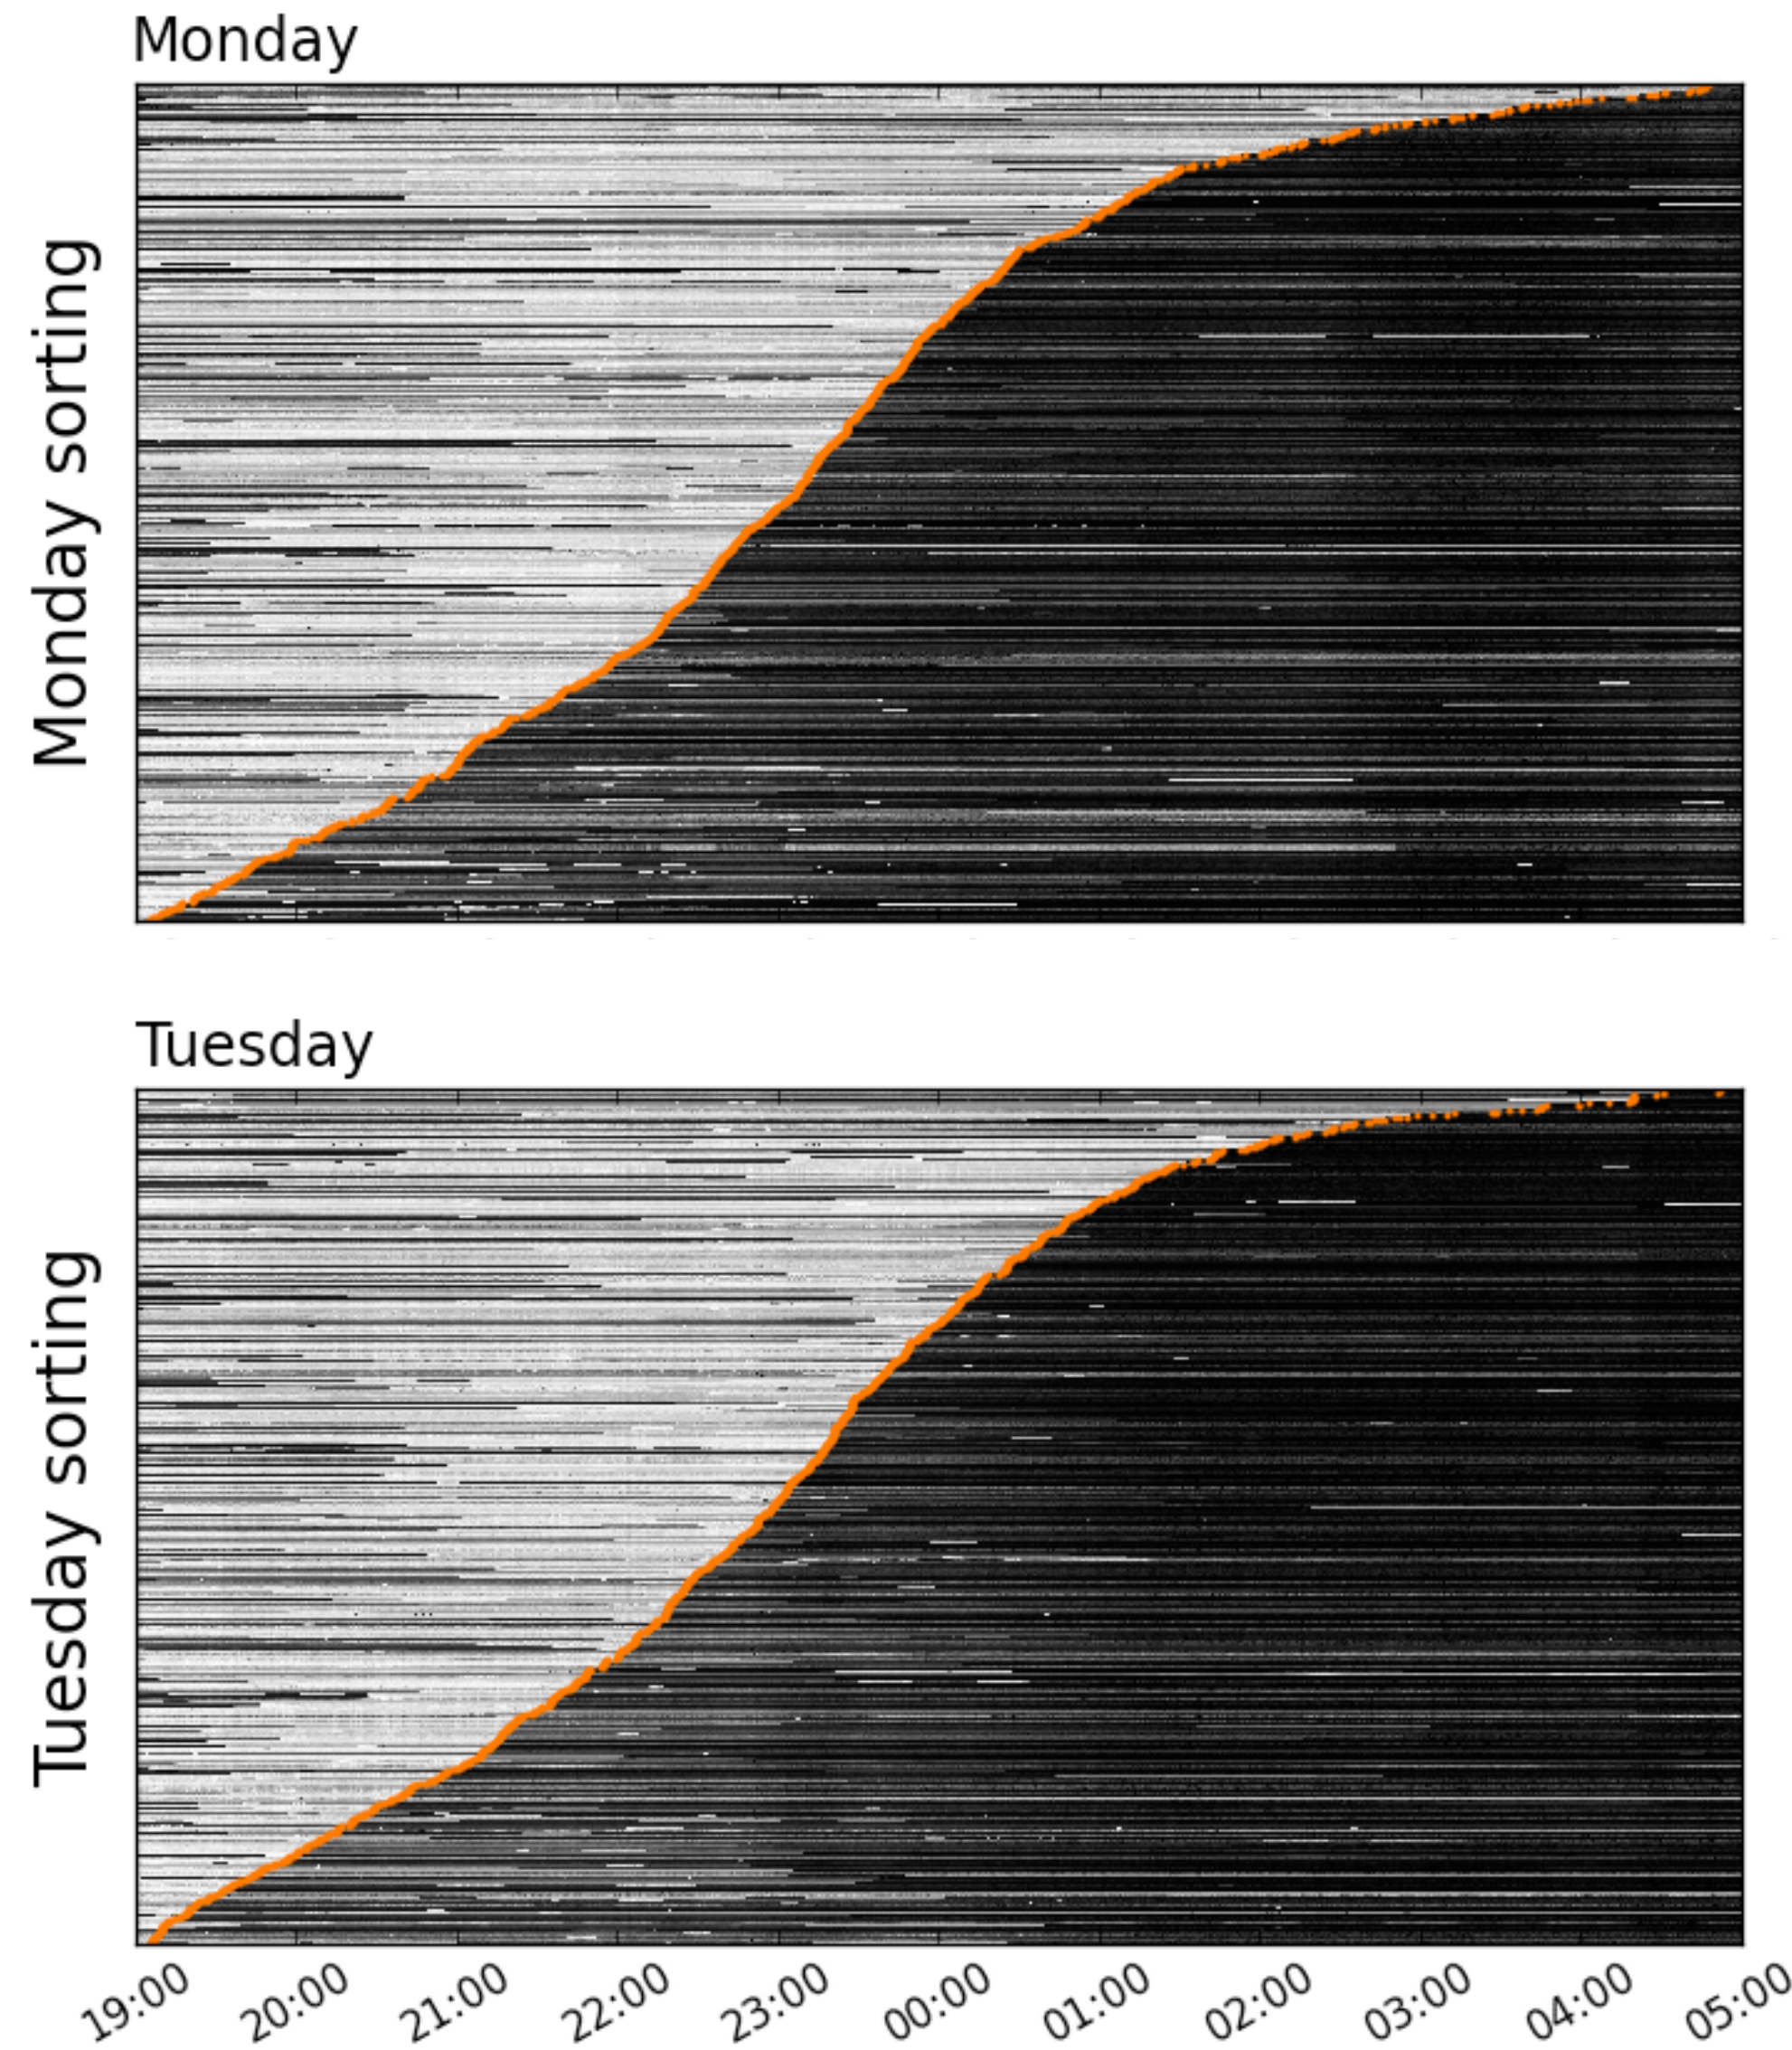

The distribution of off times has a very clear pattern. This is aggregate behavior of the population as measured via observations “from a distance” as opposed to survey (or obtrusive forms of monitoring) methodology.

Question:

are people creatures of habit?

Creatures of habit?

The distribution of off times has a very clear pattern. This is aggregate behavior of the population as measured via observations “from a distance” as opposed to survey (or obtrusive forms of monitoring) methodology.

Question:

are people creatures of habit?

Answer #1: NO!

Answer #2: YES!

Answer:

society is a creature of habit, individuals are not.
